

Freelancer Jekyll theme

Jekyll theme based on [Freelancer bootstrap theme](#)

How to use

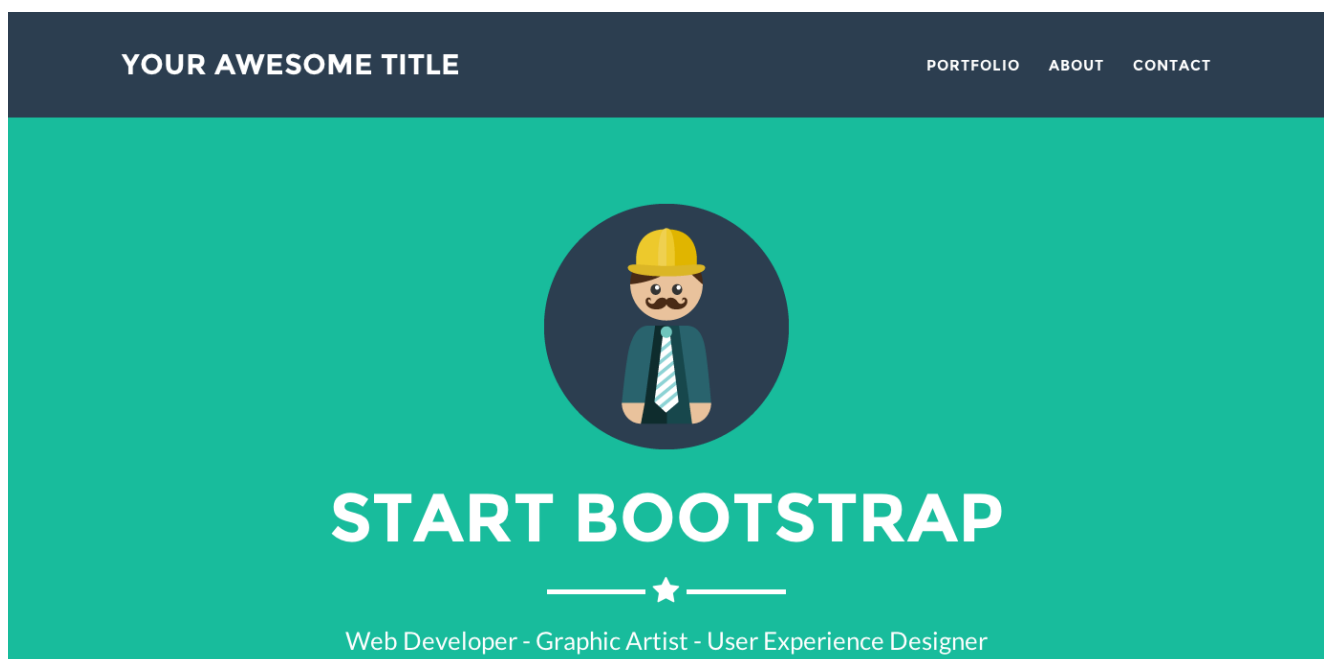

- Place a image in `/img/portfolio/`
- Replace `your-email@domain.com` in `_config.yml` with your email address. Refer to [formspre](#) for more information.
- Create posts to display your projects. Use the follow as an example:

```
---
layout: default
modal-id: 1
date: 2020-01-18
img: cabin.png
alt: image-alt
project-date: January 2020
client: The Client
category: Web Development
description: The description of the project
---
```
